2.8	Search Within an eCR	17
2.9	Fixed Patient Banner	18

1 Overview

This guide walks you through the eCR Viewer's nine features so you can successfully navigate the interface to find the information you need.

2 eCR Viewer Features

2.1 eCR Summary

The eCR Summary displays key information in a summary at the top of the eCR document. It's divided into three categories: Patient Summary, Encounter Summary, and Condition Summary.

eCR Summary

Patient Summary	
Patient Name	Drew Dunlap
DOB	12/08/1989
Sex	Female
Patient Address	999 Single Lane Beverly Hills, CA 90210, USA
Patient Contact	Home: +1-615-999-9999 Mobile: +1-615-999-9999 drew.dunlap@gmail.com

Encounter Summary	
Encounter Date/Time	Start: 02/18/2022 9:01 AM End: 02/18/2022 10:47 AM
Encounter Type	Ambulatory Transcribe Orders
Encounter Diagnosis	COVID-19
Encounter Reason	Dull chest pain
Facility Name	Vanderbilt University Adult Hospital of Vanderbilt University Medical Center
Facility Contact	Work: 1-615-322-5000

Condition Summary 3 CONDITIONS FOUND	
Viral hepatitis type C (disorder) —	
RCKMS Rule Summary Detection of Hepatitis C virus antibody in a clinical specimen by any method	
Clinical Sections Relevant to Reportable Condition	
No matching clinical data found in this eCR	
Lab Results Relevant to Reportable Condition	
Hepatitis C IgG w/Rfx PCR ABNORMAL +	
Disease caused by severe acute respiratory syndrome coronavirus 2 (disorder) +	
Plague (disorder) +	

Each category contains the following information to help you understand the eCR document at a glance:

**Patient Summary**

- Patient Name
- DOB
- Sex
- Race
- Ethnicity
- Patient Address
- Patient Contact

Encounter Summary

- Encounter Date/Time
- Encounter Type
- Encounter Diagnosis
- Encounter Reason
- Facility Name
- Facility Contact

Condition Summary

- Reportable Condition
- RCKMS Rule Summary
- Clinical Sections Relevant to Reportable Condition*
- Lab Results Relevant to Reportable Condition*

* To determine which sections of the eCR document are relevant to each reportable condition, we use the codes published by CSTE for eRSD. We aim to make the Condition Summary as accurate as possible so that it saves you time in finding data within an eCR. However, in some cases, the Condition Summary may display more or less information than what's relevant to the reportable condition.

When there's more than one Reportable Condition associated with an individual eCR, the Condition Summary section will display how many conditions were found in the eCR and will let you see the relevant condition information for each Reportable Condition:

Condition Summary 3 CONDITIONS FOUND

Viral hepatitis type C (disorder) —

RCKMS Rule Summary Detection of Hepatitis C virus antibody in a clinical specimen by any method

Clinical Sections Relevant to Reportable Condition

No matching clinical data found in this eCR

Lab Results Relevant to Reportable Condition

Hepatitis C IgG w/Rfx PCR **ABNORMAL** +

Disease caused by severe acute respiratory syndrome coronavirus 2 (disorder) +

Plague (disorder) +

When the eCR Viewer is accessed through NBS, and NBS is able to pass along a Condition Code (e.g., COVID-19), the corresponding Reportable Condition section within the Condition Summary will be expanded by default.

COVID specified:

Condition Summary 3 CONDITIONS FOUND

Viral hepatitis type C (disorder) +

Disease caused by severe acute respiratory syndrome coronavirus 2 (disorder) —

RCKMS Rule Summary Detection of SARS-CoV-2 nucleic acid in a clinical or post-mortem specimen by any method

COVID-19 (as a diagnosis or active problem)

Clinical Sections Relevant to Reportable Condition

Active Problem	Onset Date	Onset Age
COVID toes	07/13/2022	33

Lab Results Relevant to Reportable Condition

SARS-CoV-2 PCR **ABNORMAL** +

Plague (disorder) +

Otherwise, if NBS isn't able to pass along a Condition Code, the first condition in the list of Reportable Conditions will be expanded by default.

No condition specified:

Condition Summary 3 CONDITIONS FOUND

Viral hepatitis type C (disorder) —

RCKMS Rule Summary Detection of Hepatitis C virus antibody in a clinical specimen by any method

Clinical Sections Relevant to Reportable Condition
No matching clinical data found in this eCR

Lab Results Relevant to Reportable Condition
Hepatitis C IgG w/Rfx PCR **ABNORMAL** +

Disease caused by severe acute respiratory syndrome coronavirus 2 (disorder) +

Plague (disorder) +

2.2 Consistent Organization

We've grouped the full eCR document into five main sections:

- **Patient Info**
- **Encounter Info**
- **Clinical Info**
- **Lab Info**
- **eCR Metadata**

No matter who sent the eCR, every eCR you view in the eCR Viewer will look the same. The ordering of the five main sections, as well as the fields within those sections, is always the same, so you can quickly scroll through the eCR to find the information you're looking for.

2.2.1 Patient Info

This section includes all information about the patient, split into three categories: Demographics, Social History, and Pregnancy Info

Fields currently available include:

Demographics

- Patient Name
- DOB
- Age at Encounter
- Vital Status
- Date of Death
- Sex
- Race
- Ethnicity
- Tribal Affiliation
- Preferred Language

- Patient Address
- County
- Contact
- Emergency Contact
- Parent/Guardian
- Patient IDs

Social History

- Tobacco Use
- Alcohol Use
- Exposure Contacts
- Travel History
- Occupation and Occupation History
- Nationality
- Country of Residence
- Disability Status
- Homeless Status
- Sexual Orientation
- Marital Status
- Religious Affiliation
- Social Determinants of Health

Pregnancy Info

- Pregnancy Status
- Postpartum Status
- Last Menstrual Date

2.2.2 Encounter Info

This section includes all information relevant to where the patient was seen for the medical encounter, split into four categories: Encounter Details, Facility Details, Provider Details, and Hospital Encounter Details.

Fields currently available include:

Encounter Details

- Encounter Date/Time
- Encounter Type
- Encounter ID
- Encounter Diagnosis
- Encounter Care Team
 - Name
 - Role
 - Dates

Facility Details

- Facility Name
- Facility Address
- Facility Contact

- Facility Contact Address
- Facility Type
- Facility ID

Provider Details

- Provider Name
- Provider Address
- Provider Contact
- Provider Facility Name
- Provider Facility Address
- Provider ID

Hospital Encounter Details

- Hospital Admission Diagnosis
- Admission Medications
- Hospital Discharge Diagnosis

2.2.3 Clinical Info

This section includes all medical information about the patient other than lab results. It's split into five categories: Clinical Notes, Symptoms and Problems, Treatment Details, Immunizations, and Diagnostics and Vital Signs.

Fields currently available include:

Clinical Notes

- Miscellaneous Notes

Symptoms and Problems

- Reason for Visit
- Problems List
 - Active Problem
 - Status
 - Onset Date/Time
 - Onset Age
 - Comments
- Emergency Outbreak Info
- History of Present Illness

Treatment Details

- Plan of Treatment
 - Planned Activities & Appointments
 - Name
 - Scheduled Time
 - Type
 - Planned Procedures & Orders
 - Name
 - Scheduled Time

- Ordered On
- Planned Medications & Immunizations
 - Name
 - Ordered On
 - Dosage
- Care Team
 - Member
 - Role
 - Status
 - Dates
- Administered Medications
 - Medication Name
 - Start Date
 - Dose
 - Route
 - Therapeutic Response Observation
- Medications
 - Medication Name
 - Date/Time
 - Timing
 - Medication Instructions
 - Dosage Route
 - Dose Quantity
 - Rate Quantity
 - Number of Refills
 - Amount of medication to supply per dispense
 - Text
- Procedures
 - Name
 - Date/Time Performed
 - Status
 - Reason
 - Details (Reason, Body Site, Method, Outcome, Complication, Priority, Specimen, Product, Medication, Service Location, Organization)

Immunizations

- Immunization History
 - Name
 - Administration Dates
 - Dose Number
 - Manufacturer
 - Lot Number

Diagnostics and Vital Signs

- Vital Signs
 - Vital Reading
 - Result
 - Date/Time

2.2.4 Lab Info

This section includes all lab results included in the eCR, organized by where the labs were performed (i.e. all labs that happened at the same facility are grouped together).

Fields available for each Lab Organization include:

- Performing Lab Name
- Lab Address
- Lab Contact
- Number of Results

Fields available for each Lab Result include:

- Result Name
 - Component
 - Value
 - Ref Range
 - Test Method
 - Result Status
 - Lab Comment
- Analysis Time
- Observation Time
- Collection Time
- Collection Method/Volume
- Received Time
- Specimen Source
- Anatomical Location/Laterality
- Result Status
- Narrative
- Resulting Agency Comment
- Authorizing Provider
- Result Type

2.2.5 eCR Metadata

This section includes all of the information about the eCR document itself and who sent it, split into four categories: RR Details, eICR Details, and eICR Author Details, and eICR Custodian Details.

Fields currently available include:

RR Details

- Reportability Summary
 - Reportable Condition
 - RCKMS Rule Summary
 - Jurisdiction Sent eCR
 - Additional Reportability Details (Determination of Reportability Reason, Rules Authoring Agency, Responsible Agency)
- eRSD Warnings

- Warning
- Version in Use
- Expected Version
- Suggested Solution

eICR Details

- eICR ID
- Date/Time eCR Created
- eICR Release Version
- EHR Manufacturer Model Name
- EHR Software Name

eICR Author Details

- Author Name
- Author Address
- Author Contact
- Author Facility Name
- Author Facility Address
- Author Facility Contact

eICR Custodian Details

- Custodian ID
- Custodian Name
- Custodian Address
- Custodian Contact

2.3 Easy Navigation

You can use the side navigation to skip to any section within the eCR. It's always visible as you scroll so you can see where you are within the document and quickly move to different sections.

Senator MON MOTHMA 01/01/1975

Coruscant
County: Administrative Core

Provider Contact Work: 555-777-0123
Work Fax: 555-777-0987

2.4 Simplified Visual Design

The eCR Viewer uses [USWDS](#) (U.S. Web Design System) components and styling to create a simple and easy to understand look and feel. Data is standardized in repeated formats (i.e. tables, lists, notes) so you can expect formatting for data fields to look the same across different providers and conditions.

2.6 More Data Available

The eCR Viewer allows you to see more data than what's currently available by default in the HTML or surveillance system views by incorporating information from both the eICR and RR documents into a single view. We also extract more data from the eICR XML than is shown in the default HTML view.

For example, with the eCR Viewer, you can see all of the reportable conditions for the eCR, why the eCR was triggered, and which jurisdictions the eCR was sent to, all of which come from the RR data.
